

**Ex.No:10**

## **AUTOMATIC ATTACK AND PENETRATION TOOLS**

**Date:**

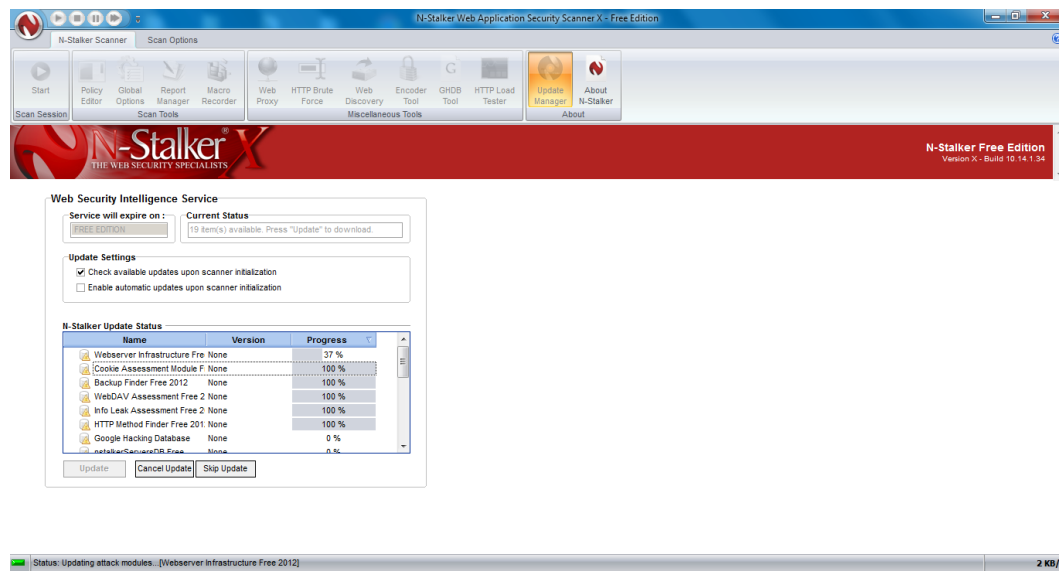

**AIM:**

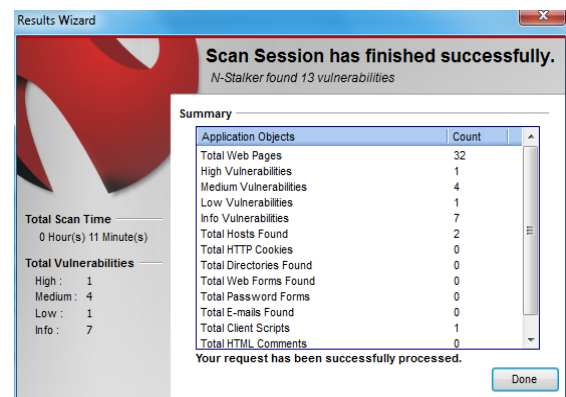

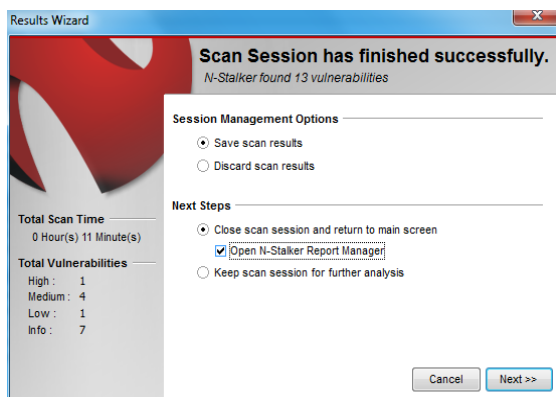

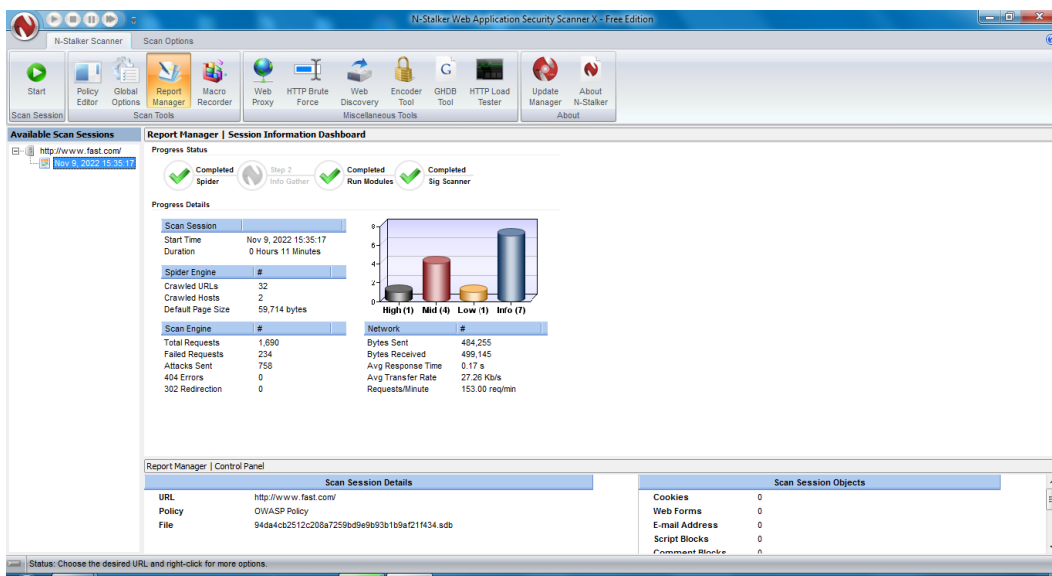

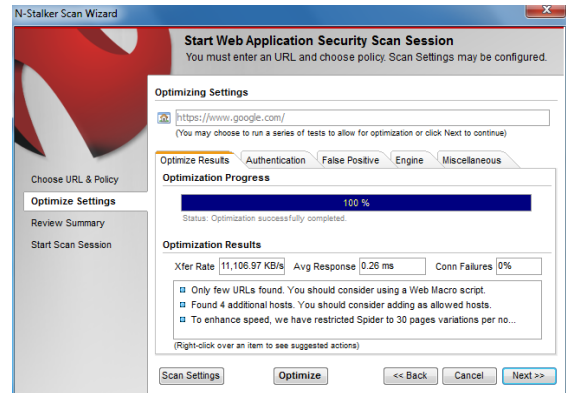

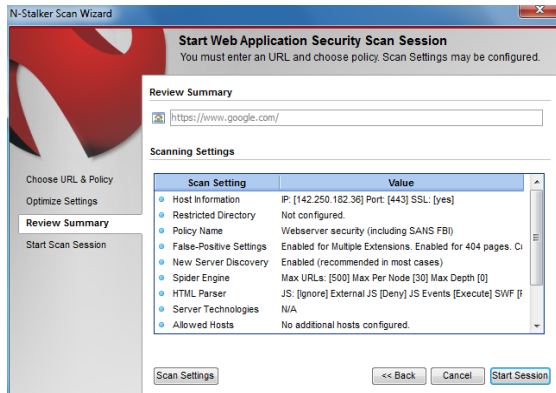

To demonstrate automatic attack and penetration tools such as N-Stalker.

### **PROCEDURE:**

1. Download and install N-Stalker from [www.nstalker.com](http://www.nstalker.com).
2. Start N-Stalker from a Windows computer. The program is installed at C:\N-Stalker\Free X by default
3. Start N-Stalker free edition.
4. Click on “Update Manager” under the “About” panel.
5. Update all the resources.
6. Once updates are done, click on “Start” under the “Scan Session” panel.
7. Now enter the URL of the website that you want to scan, or enter its IP address and select the desired policy (Manual, Full XSS, OWASP, etc.) and click on next.
8. Click on the optimize button, if desired and click on next.
9. Click on “start session”.
10. Click on “start scan” under the “session control” panel. Now the scan has actually started. Wait for the scan to complete.
11. After the scan completes, the N-Stalker Report Manager will prompt to select a format for the resulting report as choose any format desirable.
12. Review the result for any vulnerabilities.

### **OUTPUT:**

## RESULT:

Thus Automatic attack and penetration tool (N-Stalker) has been demonstrated, and the output is verified.
